What are Living-Learning Programs?

Living-Learning Programs provide students with the opportunity to thrive both in and out of the classroom in a learning environment that becomes home.

Residential Colleges focus on the interdisciplinary connections between students. Students get the benefits of a liberal arts education within the context of a global land-grant university. Led by live-in Faculty Principals, residential colleges welcome students from any major and year.

Living-Learning Communities (LLCs) are niche communities where you can live with students around a particular theme, like arts or well-being, or live with students in a similar population group, such as engineering or first-generation students. Each LLC is led by Program Directors, who are engaged in the life of their communities.
